Hard Skill

- Game Front-End & UI Optimization
- Procedural UI & Game VFX
- Custom Tool & Editor Development
- UX/UI Design (Wireframing)
- Digital Illustration
- 2D/3D Animation

Soft Skill

- Cross-Functional Collaboration
- Analytical Problem-Solving
- Rapid Learner & Highly Adaptable
- Creative Ideation
- Growth Mindset
- Task & Workflow Management
- Excellent Interpersonal & Social Skills

Tools

- Unity
- Visual Studio
- IntelliJ IDEA
- VS Code
- Git Hub
- Blender
- Figma
- Clip Studio
- Adobe Photoshop
- Adobe After effect
- Adobe Illustrator
- Adobe Premiere Pro
- Adobe Substance Painter

Programming Languages

- Advanced C#
- C / C++ (Low-Level)
- Python, Java, JavaScript

Education

2021 - Present
Mahasarakham University (MSU)
Creative Media (CMD), Faculty of
Informatics

Languages

THAI **NATIVE SPEAKER**
ENGLISH **A2**

Junior Game Developer (Intern)

Rievel Games CO., Ltd

DEC 2025 - AUG 2026

- UI Architecture & Memory Management Architected a dynamic UI Page Manager framework (C#) using smart caching and on-demand instantiation to minimize RAM footprint and prevent memory leaks.
- UI Virtualization & Optimization Implemented cell recycling and object pooling for high-density scroll views (Inventory/Chat), reducing draw calls and sustaining FPS on low-end devices.
- Technical Art & Procedural UI Wrote procedural mesh logic for dynamic stat graphs and developed custom UI shaders (SoftShadow, Kawase Blur) with gyro-driven parallax effects.
- Visual Novel & Narrative Tool Developed an optimized in-house Visual Novel engine supporting 3D-to-UI rendering, state-driven emotion sync, and seamless integration with core campaign loops.
- Game Systems & API Integration Built an end-to-end Gacha presentation flow and integrated real-time backend APIs for 3D matchmaking lobbies, global chat, and quest progression.

Capstone Project - "Alchemite" (Game Project) Final Year University Project

- Developed a game inspired by the periodic table, combining educational elements with engaging gameplay
- Took full responsibility for Game Design, Programming, and Visual Implementation
- Built core systems in Unity (C#), designed gameplay mechanics, and implemented all in-game visuals including UI and FX

Meena: Little Witch - Indie Game Project 2025

- A 2D adventure-platformer game developed in Unity, available on itch.io
- Responsible for visual implementation (UI, layouts, in-game effects) and programming (gameplay systems and mechanics)
- Focused on delivering a smooth player experience by integrating visual elements closely with game logic

Independent Game Developer 2015

- Developed multiple personal and freelance game projects focusing on UI architecture, tool creation, and interactive prototypes in Unity.
- Bridged game design and programming by implementing core gameplay loops, in-game visual effects, and digital art assets.

PORTFOLIO
